

Introdução Ao GitHub

Proponentes: João Guilherme Sales de Oliveira
Gabriel Araujo Soares

O que é o GitHub?

É uma plataforma de hospedagem de códigos para controle de versão.

O que irei aprender?

Como criar repositórios, que é normalmente utilizado para organizar um projeto. Repositórios podem conter pastas, arquivos, imagens, vídeos, planilhas, datasets, tudo que o seu projeto precisar.

Downloading Git

Your download is starting...

You are downloading the latest (2.27.0) 64-bit version of **Git for Windows**. This is the most recent [maintained build](#). It was released **8 days ago**, on 2020-06-01.

[Click here to download manually](#), if your download hasn't started.

Other Git for Windows downloads

Git for Windows Setup

[32-bit Git for Windows Setup.](#)

[64-bit Git for Windows Setup.](#)

Git for Windows Portable ("thumbdrive edition")

[32-bit Git for Windows Portable.](#)

[64-bit Git for Windows Portable.](#)

The current source code release is version 2.27.0. If you want the newer version, you can build it from [the source code](#).

Nome_Do_Repository

Great repository names are short and lowercase. Your new repository will be created as Nome_Do_Repository.

Description (optional)

☒  Public

Anyone can see this repository. You choose who can commit.

☐  Private

You choose who can see and commit to this repository.

Skip this step if you're importing an existing repository.

☒ **Initialize this repository with a README**

This will let you immediately clone the repository to your computer.

Add .gitignore: None

Add a license: None

Create repository

Learn Git and GitHub without any code!

Using the Hello World guide, you'll start a branch, write comments, and open a pull request.

README.md

Initial commit

Inicializando o Repositório no seu Computador

Baixe o Repositório criado (Já existente)

Mostre ao computador que essa pasta se trata de um repositório git, para isso use “Git Init”

Se você abrir a pasta no File Explorer e configurar ele para mostrar os arquivos ocultos, verá que tem uma pasta a mais chamada .git:.
(No linux use ls -l)

Como Sincronizar o Repositório Local que nós criamos no Git com o da nossa máquina?

```
git remote add origin git@github.com:joaoguilhermes/Pasta_Atual.git
```

**MANDANDO O
ARQUIVO PARA O
REPOSITÓRIO.**

Mandando o Arquivo para o Repositório

git status

git add Arquivo_Não_Gerenciado.XXX (para o caso de você estar adicionando um novo arquivo - eles aparecem em **Untracked files** (não gerenciados)) - pode usar **git add .** também.

Guarda o estado do arquivo final no Repositório:

git commit -m "aqui coloco uma mensagem, tipo: comitando primeiro post"

Envia para o Repositório:

git push -u origin master ou
git push --force origin master

**Maneira alternativa -
mais fácil (Windows e
Linux)**

Let's get started!

Add a repository to GitHub Desktop to start collaborating

Create a tutorial repository...

Clone a repository from the Internet...

Create a New Repository on your hard drive...

Add an Existing Repository from your hard drive...

ProTip! You can drag & drop an existing repository folder here to add it to Desktop
